

MountainViews Community - Draft Strategy 2015-2020

The MountainViews (MV) Community has come together around the MountainViews.ie website operated by Simon Stewart since 2002. Over the years between then and now, the development of the website had been paralleled by the development of a loose arrangement of like-minded people, who have interacted in various ways, becoming a community gathered around the website, but also existing independently of it.

In 2008, a committee was formed to perform the twin tasks of addressing the needs of the wider community as well as supporting and directing the operation of the website to better serve that community.

By 2014 the committee was aware of both the huge success of the website and its offerings, and of the importance and value to a large number of people of both the website and the Community. It was also critically aware of the *ad hoc* nature of the structures and processes of both website and community and the lack of any coherently expressed values and planned objectives. The committee was acutely conscious of resource pressures, both financial and in our over-reliance on a relatively small number of volunteers, and on the impact this might have on ensuring the future of both website and community.

To address these issues, the committee decided to begin the development of a formal strategy and planning process for the MV Community. This began in December 2014 and this paper is the first formal draft of that Strategy which is published to invite further input from the wider Community.

Way Forward

The Committee hope that by formalising the MV structure and instigating a planning process, that we will secure the huge resource that is MV for future generations of Hillwalkers.

The Committee invites the views of members and other interested parties on the proposed strategy. We are well aware that we are a broad church, and have within our membership a very diverse set of skills and interests. These views are actively sought, whatever form they take.
